EXAMINER'S AMENDMENT

(1)

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Edward A. Meilman on April 12, 2004.

The application has been amended as follows:

Claims 3 and 4 have been cancelled.

(2)

The following is an examiner's statement of reasons for allowance: Hakotani et al. disclose or suggest using alumina or magnesia powder of average particle size of 1 micron (1000 nm) or 1.9 microns (1900 nm) as the inorganic material of constraining layers while Fukuta et al. 5,470,412 suggests using alumina of average particle size of 0.5 microns (500 nm). The prior art of record does not disclose or suggest limiting the inorganic material of the constraining layers to comprising alumina powder having a particle size of about 100 nm or less, as claimed in Claim 6, which according to the specification allows the alumina to dissolve in a glassy phase of the borosilicate glass so as to form a reaction layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for

Allowance."

(3)

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melvin Curtis Mayes whose telephone number is 571-272-1234. The examiner can normally be reached on Mon-Fri 7:30 AM - 4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Crispino can be reached on 571-272-1226. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
